- To scale your customer expectation and employee growth.
- We deliver unmatched quality service and thus enhance the customer's satisfaction.

Our Values

- Making and maintaining long lasting relationship with our clients
- By delivering quality services on time to the clients
- Offering innovative business solutions
- Adapt seamlessly to customer needs and requirements .
- Providing best suited cost effective solutions.

Media Coverage

An organization that brought the paradigm shift in the Electronic Gadget industry.

VIE Technology is involved in the business for providing technology solutions to people. VIE always steps ahead by opening new horizons and creating new trends instead of following the beaten track. VIE have made significant and noticeable forays into executing a number of prestigious electronic products. With their vision to be a globally envied company by providing right solutions with best practices leveraged by technology and the people, VIE is bound to be the next top notch.

VIE Technology is one such company that though being commercially competitive is clear with their intentions of serving the common mass and making technology easily available to them with complete service and solutions. Most of the products they launch is for the betterment of people. Few of their revolutionary products under **R & D** are **Bomb Detection System, Paperless Money, E-shopping and printable Mobile Phones**. Going with their current market success and product craze, we are sure the upcoming products will rock as well. It is the same company that made their innovative Digital Menu patent and Introduced Tablets in India in the year 2008 itself. They also brought the windows Tab in the market.

They deal in tabs and android phones that are highly competitive in the market and also manufactures phones that are well equipped with every feature and very much in budget of a minimum wage labour. The idea is to make technology available to one and all. VIE is one electronic company that deals only in innovative products. Pick up their brochure, and you are bound to be amused with the gizmos they create, the ones you could only think of. **GSM Landline, Laser Measurement Device, Digital Menu** to name a few. Innovative plus eco-friendly products. Their "sms printer" is the revolution that cuts down on the paper usage drastically and it even saves call costs. VIE takes it as its social responsibility to respect our nature and believes in growing green economy. VIE has earned their **respect in the market** mostly because of their dedicated team of **Quality Control**. Each and every product is manual tested before it is shipped and hence they have a very sleek chance of entertaining grievances.

The eco-friendly revolution in technology.

VIE TECHNOLOGY CURRENTLY PROVIDING OEM(Original Equipment Manufacturing) TO 14 BRANDS AND MANUFACTURE AROUND 18,000 TABS PER MONTH IN OEM.VIE HAS 450+ SERVICE NETWORKS ACROSS INDIA AND PROVIDES SERVICE TRAINING TO EACH ONE.

What makes VIE Technology stand tall is their pious motive to uplift SMEs and help them create their brand value. VIE provide end to end support to all budding mobile companies to be able to successfully import and get their innovative products manufactured. It doesn't ends here. They even assist in increasing sales, building strategies, providing marketing support and in the overall grooming of the companies. They provide solutions for the hurdles faced in import and sales and also takes care of the shipping and documentation issues, so that the SMEs can concentrate on their products and sales alone. It's a new trend VIE started, that is "our business is to mind YOUR business".

VIE Technology Pvt. Ltd. Is not just limited to electronics. Their sister concerns "**Aperture**"-deals in Training and Management and "**Sun Vitality Systems**"- the software Development Company has their bases equally firm.
